

Please respect our privacy and do not allow the attempt by the CBA to weaken our Indiana telephone privacy laws. We are busy and intelligent consumers and we know what is available. We do not need anyone calling and interrupting our family lives to tell us about their "Special Offers." Our family time is too short as it is! As a military family our time together or on the phone is even more precious. It is very irritating when marketers call and interrupt our home lives and our conversations by phone when that is all we have sometimes. My family and I appreciate your sincere attention to this matter.

Thank You,
Melissa Bryant and Family
